

Jack M. Kartush, M.D.

CURRICULUM VITAE – Very Brief

2021

POSITIONS

President - Michigan Ear Institute 1987 - 2012

Chief Medical Officer Bionics NeuroNetwork 2008 - 2012

Staff Surgeon - Otolaryngology, Neurotology and Skull Base Surgery, Providence Hospital and William Beaumont Hospital since 1986

Clinical Professor -

Otolaryngology Wayne State University, Detroit, MI

Surgery Oakland University William Beaumont School of Medicine

EDUCATION

1970-1974

College Michigan State University – High Honors

1974-1978

Medical School University of Michigan
Neurosurgery Externship - 1977
Stockholm, Sweden

1978-1984

General Surgery and Otolaryngology Residency
University of Michigan

1984-1985

Fellowship - Otolaryngology & Skull Base Surgery -
University of Michigan

HONORS AND AWARDS

Pope John Paul II: Special Apostolic Blessing for Care of the Poor

Lifetime Distinguished Achievement Award – Intraoperative Monitoring.
American Society of Neurophysiological Monitoring, Vancouver, 2009

Honor Award - American Academy of Otolaryngology 1990

Distinguished Service Award - American Academy of Otolaryngology 2014

ELECTED OFFICES

Founding President: American Society of Neurophysiological Monitoring (ASNM) (June, 1989)

President: American Neurotology Society, 1996-1997

President: Michigan Otolaryngology Society, 1991-1992

CITED IN:

1. **US News and World Report**
2. **Best Doctors in America**
3. **Best Doctors in Michigan**
4. **Metro Detroit's Best Doctors**
5. **America's Top Doctors**

MUSIC

Composed and performed Opening Theme for:

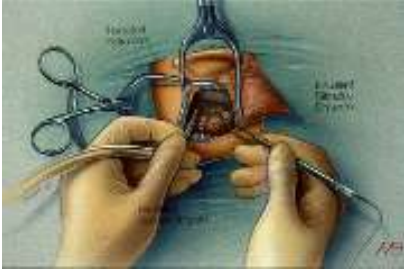

FOX TV 10 O'Clock News: 1997 Lexington, Kentucky

Metro Times Music Award: Detroit's **Best Guitarist and composer** in "Rhythm and Blues" - 1982

MEDICAL INVENTIONS

Kartush Stimulating Dissectors

Facial Nerve Integrity Monitor

Ossicular Struts

Tympanic Membrane Patches

“Big Easy” Stapes Piston

Kartush Laryngeal Electrode

MERI Apple Store App

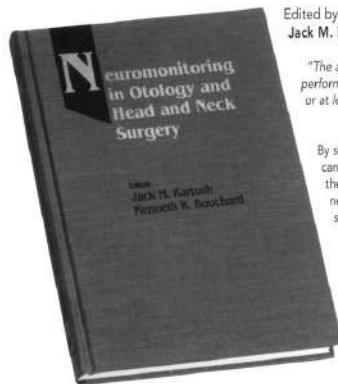

Matrix Stapes Piston

SCIENTIFIC PUBLICATIONS

220 articles, chapters, books and videos.

The standard-setting text on intraoperative neuromonitoring for safe surgery...

Edited by
Jack M. Kartush, M.D. and Kenneth R. Bouchard, Ph.D.

"The authoritative text on neuromonitoring... All those who perform otological and/or head and neck surgery should own, or at least read, this book."

— *Annals of Otolaryngology, Rhinology, and Laryngology*

By showing otolaryngologists how intraoperative neuromonitoring can help reduce or prevent damage to nerves during surgery on the face, head and neck, this definitive, how-to-text has helped neuromonitoring evolve from relatively primitive roots to a sophisticated standard technique used in many medical centers.

A multidisciplinary volume, contributed to by experts in the fields of otolaryngology, neurology, and anesthesiology, details the principles of neurophysiologic monitoring and covers specific monitoring techniques to reduce the incidence of nerve injury whenever the facial nerve is at risk.

1992/272 pages/90 illustrations ISBN 0-88167-846-5

INTERNATIONAL CLINICAL PRACTICE GUIDELINES

"Best Practices in Facial Nerve Monitoring" – 2021

Laryngoscope, 131: S1-S42. <https://doi.org/10.1002/lary.29459>

EDITORIAL RESPONSIBILITIES

Member - 10 Editorial Review Boards

SOCIETY MEMBERSHIPS

20 state, national and international societies

CONSULTANT TO INDUSTRY

Lasers, microscopes, surgical prostheses, spine surgery, nerve monitoring, NIH Consultant, Medicolegal Expertise
